## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 102, 103, 105 and 124 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the specification for a means for operating the apparatus in a "demonstration mode", where in the demonstration mode a program mode, self-diagnostics mode and normal operations mode are demonstrated but not actually operated. Referring to the specification at page 24, it appears that the "demonstration mode" is obtainable by the user along with the program mode, self-diagnostic mode and normal operations mode. Once in the "demonstration mode" it is apparent that a simulation of the normal operations mode may be obtained, but there is nothing referring to a simulation of the program mode or self-diagnostic mode.

### ***Allowable Subject Matter***

Claims 1-6, 8-26, 28-31, 33, 37-39, 91-93, 97-99, 101, 104, 106 and 108-123 are allowed.
